## SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2013-2017 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Subject	Davie County, North Carolina			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	15,895	+/-369	15,895	(X)
Family households (families)	11,340	+/-468	71.3%	+/-2.5
With own children of the householder under 18 years	4,313	+/-351	27.1%	+/-2.0
Married-couple family	9,179	+/-475	57.7%	+/-2.9
With own children of the householder under 18 years	3,152	+/-323	19.8%	+/-2.0
Male householder, no wife present, family	689	+/-216	4.3%	+/-1.3
With own children of the householder under 18 years	367	+/-202	2.3%	+/-1.3
Female householder, no husband present, family	1,472	+/-260	9.3%	+/-1.6
With own children of the householder under 18 years	794	+/-203	5.0%	+/-1.3
Nonfamily households	4,555	+/-421	28.7%	+/-2.5
Householder living alone	3,935	+/-392	24.8%	+/-2.3
65 years and over	2,103	+/-264	13.2%	+/-1.6
Households with one or more people under 18 years	4,787	+/-356	30.1%	+/-2.0
Households with one or more people 65 years and over	5,465	+/-183	34.4%	+/-1.2
Average household size	2.60	+/-0.06	(X)	(X)
Average family size	3.11	+/-0.10	(X)	(X)
RELATIONSHIP				
Population in households	41,383	+/-89	41,383	(X)
Householder	15,895	+/-369	38.4%	+/-0.9
Spouse	9,143	+/-477	22.1%	+/-1.1
Child	12,550	+/-637	30.3%	+/-1.6
Other relatives	2,237	+/-400	5.4%	+/-1.0
Nonrelatives	1,558	+/-340	3.8%	+/-0.8
Unmarried partner	804	+/-224	1.9%	+/-0.5
MARITAL STATUS				

Subject	Davie County, North Carolina				
	Estimate	Margin of Error	Percent	Percent Margin of Error	
Males 15 years and over	16,642	+/-98	16,642	Error (>	
Never married	4,175	+/-407	25.1%	+/-2.	
Now married, except separated	9,914	+/-550	59.6%	+/-3.	
Separated	256	+/-129	1.5%	+/-0.	
Widowed	431	+/-149	2.6%	+/-0.	
Divorced	1,866	+/-378	11.2%	+/-2.	
Females 15 years and over	17,798	+/-103	17,798	(X	
Never married	3,973	+/-362	22.3%	+/-2.	
Now married, except separated	9,652	+/-611	54.2%	+/-3.	
Separated	369	+/-150	2.1%	+/-0.	
Widowed	1,893	+/-270	10.6%	+/-1.

COMPUTERS AND INTERNET USE					
Total households	45.005	. / 200	45.005	()()	
With a computer	15,895	+/-369	15,895	(X)	
	13,503	+/-419	85.0%	+/-2.1	
With a broadband Internet subscription	12,241	+/-441	77.0%	+/-2	

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using 2013 data or multi-year data containing data from 2013. For more information, see: Language User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

Data about computer and Internet use were collected by asking respondents to select "Yes" or "No" to each type of computer and each type of Internet subscription. Therefore, respondents were able to select more than one type of computer and more than one type of Internet subscription.

The category "with a broadband Internet subscription" refers to those who said "Yes" to at least one of the following types of Internet subscriptions: Broadband such as cable, fiber optic, or DSL; a cellular data plan; satellite; or a fixed wireless subscription.

An Internet "subscription" refers to a type of service that someone pays for to access the Internet such as a cellular data plan, broadband such as cable, fiber optic or DSL, or other type of service. This will normally refer to a service that someone is billed for directly for Internet alone or sometimes as part of a bundle.

"With a computer" includes those who said "Yes" to at least one of the following types of computers: Desktop or laptop; smartphone; tablet or other portable wireless computer; or some other type of computer.

In 2016, changes were made to the computer and Internet use questions, involving the wording as well as the response options. A crosswalk was used to map pre-2016 data to the post-2016 categories, enabling creation of 5-year data. For more detailed information about the 2016 changes, see the 2016 American Community Survey Content Test Report for Computer and Internet Use located at https://www.census.gov/programs-surveys/acs/methodology/content-test.htm or the user note regarding changes in the 2016 questions located at https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes.html. For more detailed information about the crosswalk, see the user note regarding the crosswalk located at https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes.html.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

## Explanation of Symbols:

- 1. An '\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
  - 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
  - 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
  - 6. An '\*\*\*\*\* entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
  - 8. An '(X)' means that the estimate is not applicable or not available.
