

Upper Cape Fear River Basin Association

Station B3040000/UCFRBA #20 Relocated

- Station B3040000/UCFRBA #20 has been relocated due to safety concerns
- This station is co-monitored with the DWR Ambient Monitoring Program, who expressed safety concerns due to the bridge's high railings and heavy traffic
- Found suitable sampling location on a stormwater control structure just upstream, which is accessible via a foot path
- New location is in a game land, so orange vests are required during hunting season
- USGS gauge also located at this site

Old Location

New Location

Memorandum of Agreement (MOA) Renewal

MOA Content

- Sent out updated MOA draft in August
- Please review and notify Maya, Jen, or I if you have any comments/revisions
- We will be cleaning this up to present to the Board in January to approve for signatures

Sampling Station Review

Visiting each site to:

- Update site information
- Take up-to-date photographs
- Evaluate sites for safety concerns

Received request from Durham to re-add Station B3300000/21

- Northeast Creek at SR1102 Sedwick Road near RTP

Please submit any other station change requests to Maya, Jen, or I to present to the Board in January
